## Overview

### Dhaulagiri Expedition:

The ascent is one of the most well-known and popular ones there is to participate in all of Nepal. Because this mountain is shaped like a dome shape. And getting to the climbing area is not that much difficult. Its shape made it very simple to gain access to the climbing area. The summit of the mountain can be located in the Himalayas, to the west of the Annapurna range.

Dhaulagiri I is the sixth-highest peak in the world. Since it is situated at an altitude of 8167 meters above mean sea level. The Muktinath pilgrimage track that ascends the Kali Gandaki Valley is just below its path. That is perched high above the valley floor. The massive mountain covers the remote regions of [Dolpo](#) to its north. And similarly, its west divides Nepal's far western hills from the rest of the country. Both sides of the mountain are located in Nepal. We can only obtain a good view of the mountain up close in the east, along the Kali Gandaki Valley. As a result, the colossal Dhaulagiri, with its flawlessly symmetrical peak and four prominent outliners, remains to be a mystery around the majority of its circle.
